

What is Heylo™?

Heylo is the world's first
leakage notification system
for ostomy care

Proven to reduce the fear
of leakage in everyday
life, Heylo gives your
patients time off from
worrying about leakage.

Heylo™

How does Heylo™ work?

Always checking

Heylo checks for leakage 1000 times an hour so your patients don't have to. It fits underneath the baseplate and makes direct contact with the skin around the stoma.

Always connected

Heylo connects to your patients' phone via Bluetooth and lets them know straight away if there's a problem.

Always secure

Now your patients can take time off from worrying about leakage. And, whenever they feel the need for reassurance, they can discreetly open the app and check the status underneath the baseplate – like checking their phone for messages.

How can my patient get Heylo?
